

Course with Dra. Inês Barbosa e Dra. Erika Clavijo

Absolute Isolation and Fiberglass Post. Why, When and How?

October 11 - 12, 2019

Designed for dental professionals, this course represents a great opportunity to learn and deepen knowledge in this area.

Dra. Inês Barbosa

- Graduated in Dentistry from University Fernando Pessoa, Porto, Portugal •
- Aesthetic Dentistry in 2011 from Aparicio clinic and International University of Catalunya, Barcelona, Spain.
- Associate member of the Brazilian Society of Aesthetic Dentistry, SBOE, Rio de Janeiro, Brazil •
- Active member of the International Digital Dentistry Society.
- Lectured in several courses and congresses around the world focused on Aesthetic Dentistry, Integrated Aesthetic Dentistry, Smile Design and Multidisciplinary Approaches.

Dra. Erika Clavijo

- Graduated in Dentistry from São Leopoldo Mandic Dental Research Center - Brazil
- Specialist in Endodontics FOP - UNICAMP - Brazil
- Master and PhD in Clinical Dentistry, with concentration area in Endodontics by FOP - UNICAMP - Brazil
- Author of several articles
- Private Clinic for more than 10 years

Absolute Isolation and Fiberglass Post. Why, When and How?

Goals

1st day |

- How to select the right material for efficient insulation
- different techniques and approaches for different types of complexity.

2nd day |

- Evaluate, plan and use fiberglass intrarradular retainers safely.
- One of the major causes of failure of endodontic treatment is the absence of a permanent restoration and / or the presence of inadequate restorations, leading to microleakage, leading to the development or maintenance of periapical lesions.
- Achieve success and predictability with the use of composite resin filler and / or fiberglass pin cementation in endodontically treated teeth.

Course

Day 1 - Morning | Dra. Inês Barbosa

- Introduction
 - Theoretical class about recognition and the need for adequate insulation for safer and longer lasting adhesion
 - Clinical cases examples
-

Absolute Isolation and Fiberglass Post. Why, When and How?

Day 1 - Afternoon |

- Hands on: Experiment with different types of insulation on the front and back teeth, from veneer placement, overlays of class V restorations and crowns.

Day 2 - Morning | Dra. Erika Clavijo

- introduction
- Theoretical class on the importance of immediate coronary shielding in treated endodontically treated teeth when using the filling in composite resin and when the use of intraradicular retainers.
- when, how and why to perform immediate coronary shielding.
- Step by step preparation of intraradicular fiberglass retainer with composite resin.
- Step by step cementing of the intraradicular retainers.

Day 2 - Afternoon |

- clinical cases examples
- Hands on - custom intraradicular retainers and cementing.

Absolute Isolation and Fiberglass Post. Why, When and How?

Language

This course will be taught in Portuguese.

Investment

The access to this course is subject to registration and payment, via LDA website.
General access: **1 250€**

Material

All material required during this course is the responsibility of the Lisbon Dentistry Academy.

The student can bring his magnifying glass (if he uses it).

Location

Lisbon Dentistry Academy

Conditions

LDA reserves the right to cancel the course until 15 days before it starts, due to all reasons beyond its control.
